## Frontend Developer

Hamilton, NJ   267-980-7911

Kevin91purcell@gmail.com

A user-focused Frontend Developer proficient in React, JavaScript, and HTML & CSS. Single-handedly implemented testing on a large project, optimized landing pages to be SEO compliant, and a life-long learner passionate about learning new technologies.

## SKILLS

JavaScript, React (Hooks and Context), Redux, jQuery, HTML & CSS, Sass, Bootstrap, Semantic UI, NodeJS, Express, MongoDB, Mocha,  GIT, VSC, Command Line, Firebase, Heroku

## PROFESSIONAL EXPERIENCE

***Frontend Web Developer***   *April 2019 - Current*
*GreenTool, Philadelphia, PA*

My responsibility as a Front-End Web Developer was to focus on improving the user experience for the employee portal system:

- Created mobile responsive pages with HTML, CSS, JavaScript, and Bootstrap. Also managed data flow through a mix of NoSQL, Flask, and jQuery.
- Used Git to track tickets as well as maintain version control.
- Leveraged selenium to test DOM elements.
- Participated in weekly code reviews, and collaborated with tools like Zoom and Slack to track issues and deliver solutions.

## PROJECTS

**Netflix-Clone**

- This focus of this project was to use React hooks to create a clone of the website Netflix. The user is able to browse popular genres as well as search for individual movies.

**YouTube-Clone**
- The main technologies utilized in this app are React, Semantic UI, Axios, and the YouTube API. This is a mock-up of the popular website YouTube in which the user can search for videos and receives similar videos as well.

**Todo-App**
- This app is designed to let the user create and delete tasks. The main technologies used included React and Semantic UI.
