Kevin Purcell

Front End Web Developer

Hamilton, NJ   267-980-7911
Kevin91purcell@gmail.com

OBJECTIVE

To obtain a Front-End Web Developer position where experience and passion for building interactive experiences and proactive problem solving, adept knowledge of Object-Oriented JavaScript, React, modern JavaScript libraries, and semantic HTML will be put to maximum use.

SKILLS

Front End: JavaScript, HTML & CSS, Bootstrap, React, jQuery
Back End: Python, NodeJS, Flask, Express, Django, MongoDB, MySQL
Testing: Mocha, Expect, Browser Developer Tools
Tools: Git, Postman, Visual Studio Code, Pycharm
Other: Command Line, Github, Microsoft Suite

PROFESSIONAL EXPERIENCE

Front-End Web Developer   April 2019 - Current
GreenTool, Philadelphia, PA

My job as a Front-End Web Developer is to focus on improving the user experience for the employee portal system:
- Creating responsive Front-End pages with HTML, CSS, JavaScript, jQuery, and Bootstrap while also working with the Back-End with Flask and Python.
- Projects I have completed include coding the user sign up page for new users, and developing the landing page so users may review all of their notifications. I've also validated form fields and updated media queries for older HTML files.
- Jinja templating is used frequently for displaying Back-End objects while Ajax requests and jQuery are used to update client side pages.
- Participate in weekly code reviews and planning for projects. Similarly, collaborate with tools like GitHub, Zoom, and Slack to track issues and deliver solutions.
